Managed End-Point
Security

Virus

Key Features

- **Enterprise Class Solution**
  Encompassing more than just anti-spam, this solution also provides anti-virus protection.

- **No Email Delays**
  In stream filtering means all email is scanned in real-time while other solutions save the email first and then scan it which takes too much time.

- **Simple Configuration**
  Flexible configuration options allow you to determine what constitutes spam. Personalised white lists, blacklists and rules can be set up and changed via a web interface.

- **Comprehensive Reporting**
  A wide range of detailed reports provide you visibility of the volume of email and type of threats so you can see your business is being constantly protected.

- **Scans Outbound Emails**
  An optional add-on is for outbound emails to be checked against known phishing sites to protect your business user from inadvertently propagating a virus or replying to a malicious email.

95% of businesses have an anti-virus installed, but 74% still experienced attacks last year!

Total Endpoint Security for Your Business

What is worse than a Virus? Time and money wasted recovering from one

Every minute counts in today's business. Stop wasting your valuable and scarce IT resource time and energy on the selection, testing, planning, deployment, updating and reporting of your Anti-virus software.

ASI Solutions Managed Endpoint Security service provides the skilled IT resources, domain expertise, Centralised monitoring and management facilities, and proactive approach to ensuring the protection of your desktops and laptops against the ever present threat of viruses, spam and Malware attacks.

Benefits of a Managed End-Point Security solution

- **Fully Managed Solution for the Same Price as Your Anti-virus Software!** We include enterprise class endpoint software, monitored by us 24/7, and managed by a team of technical experts that will provide you with regular reports to ensure you can see that the devices in your business are protected at all times!

- **Reduce Operating Costs** A security incident can stop you from being 100% productive at work. This costs the company a lot of money in lost productivity and in opportunity costs. A virus can hit many machines and take weeks to eradicate. Removing this risk will save you money!

- **Protect Your Company's Critical Assets and Information** Proactive technologies ensure an additional protection layer against all types of unknown malware, targeted attacks and Internet threats.

- **A Flexible Security Solution** Our advanced security features offer the appropriate security for any size of company and network.

- **Comprehensive Reporting** No longer will you be unsure of how well you are protected. We will provide you with reports monthly that let you know that you are safe!

- **Total Peace of Mind** Buying an anti-virus solution, installing it, and then relying on everyone to keep it updated is a worry. Now you can rest assured that all your servers, PCs and laptops are always protected and that there is a group of dedicated experts taking care of it for you 24/7.

Why our clients choose our Managed Anti-virus Solution

The problem with stand-alone Anti-virus Software:

- Provides a point solution to specific issues
- Requires manual monitoring and maintenance to remain current and effective
- Relies on end-user decisions for operation
- Does not provide consistent version control across desktops
- Does not provide centralized management

The advantage of Managed Anti-virus:

- Provides proactive and comprehensive security, monitoring and management
- Centralizes the deployment and updating of software to ensure coverage and consistency
- Automates management processes to avoid errors and reduce costs
- Leverages expert IT skills

Threats Facing CIOs Today

- Email Distributed Threats
- Malware & Viruses
- Spyware + Ransomware
- Data Theft
- Phishing Attacks
- Mobile Device Management
